

c.u.r.e. clinics

Travel with Project C.U.R.E. in 2023 and help deliver health & hope to the world!

Project C.U.R.E. has an **urgent need for MDs, NPs, PAs, Optometrists, and Dentists for the following medical trips:**

Cote d' Ivoire: May 25-June 6	General/primary care clinic
Paraguay: May 25- June 4	Women's health clinic (almost full!)
India: July 12-24	General/primary care clinic
India: November 1-14	General/primary care clinic

These countries face the double burden of infectious diseases and a dramatic rise in non-communicable diseases such as cardiovascular disease, chronic respiratory conditions, and type 2 diabetes. In many areas, basic healthcare is unavailable.

Project C.U.R.E. medical teams have been invited to work with local health care providers to help screen and treat patients. Our teams work to support our partners' existing efforts to improve health systems within their communities.
